Freight questions

What is freight class?
A rating from 50 to 500 based on density and handling. Your boxed ceramics at about 12 lb per cubic foot are class 70.

Why is fuel a separate line?
Carriers adjust it weekly with the price of diesel, so it is shown apart from the linehaul rate.

What if the truck waits at the dock?
Two hours are free. After that, detention is $75 an hour, so please have the pallets ready.

Do you track the LTL shipments?
Yes. Each has a PRO number, and our desk sends you a delivery confirmation.

Terms

1. Rates

1.1 Rates are valid until Dec 7, 2026 for pickups by December 11, 2026, and for the shipments as described. Fuel surcharges are recalculated on the pickup date.

2. Carrier liability

2.1 Carriers are liable for loss or damage under federal law and their tariffs. Liability limits apply unless cargo insurance is bought, as quoted here.

3. Claims

3.1 Note damage on the delivery receipt and file a claim with us within 9 months of delivery. We file and follow the claim with the carrier for you.

4. Payment

4.1 Net 30 from the invoice date for approved accounts. Each shipment is invoiced after delivery with its proof of delivery.
